## Better Management of Shared Spaces

### Smart Administrator

Manage and improve space utilization with a quick and easy setup through management console

### Book Anywhere

Book spaces from display panel, Outlook Add-in or remote booking through mobile

### Office 365 & Exchange

Synchronizes with your outlook calendar automatically.

### User/Desk Grouping

Easily form user or desk groups and apply policies or permissions across them quickly

### Desk Viewer

Search specific desk or person from the map.

### Check-In/Auto-Release

Automatically release desk to prevent resource hogging.

### Advance Desk Search

Quickly find the right desk to work by applying advance search filters

### Desk Types

Define Desk types to set predefined booking attributes to different spaces. Eg: Managed type vs Non-Managed

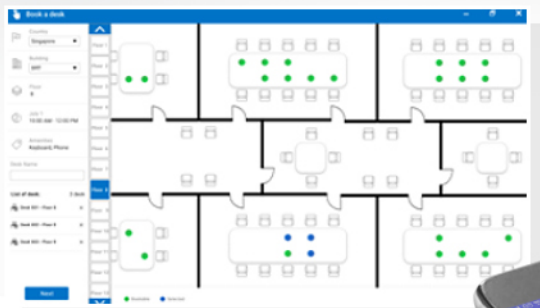

### Open Integration

Support open API.

# PANL DESK MANAGER

Make bookings anytime, anywhere.

Outlook Add-In

Mobile App

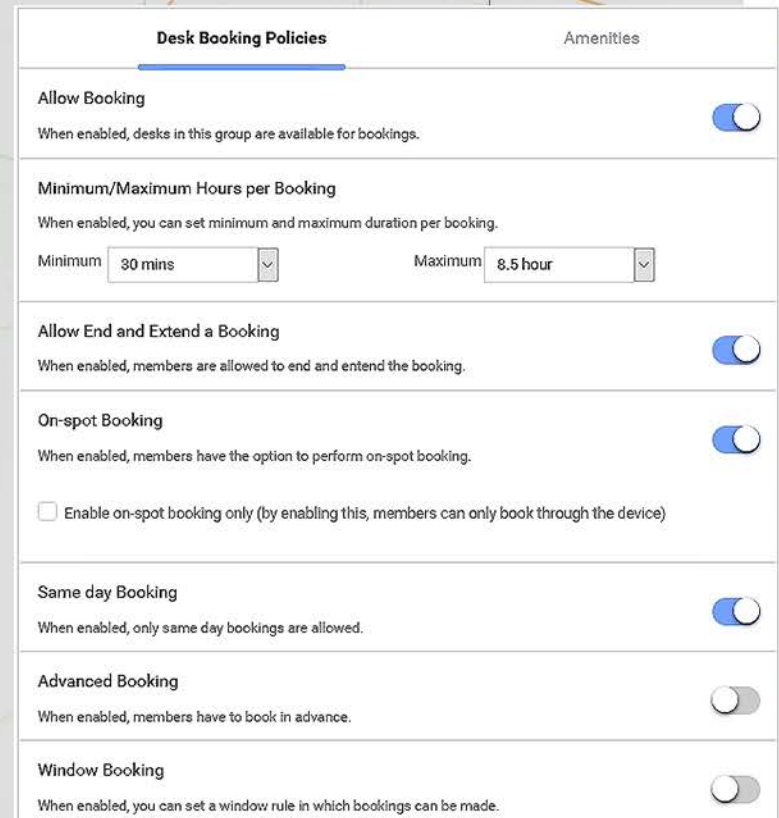

## ROBUST POLICY ENGINE

Customize booking policies the way you want it and enforce it across different users and spaces!

- Control policies with a click of the button

The screenshot shows the 'Desk Booking Policies' configuration page. It features a list of policy settings, each with a toggle switch and a brief description:

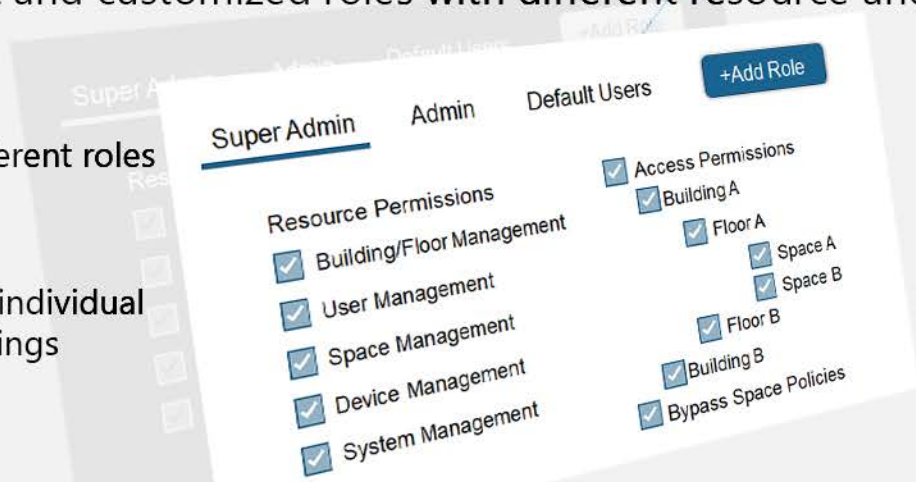

- Allow Booking:** When enabled, desks in this group are available for bookings. (Toggle: ON)
- Minimum/Maximum Hours per Booking:** When enabled, you can set minimum and maximum duration per booking. (Minimum: 30 mins, Maximum: 8.5 hour)
- Allow End and Extend a Booking:** When enabled, members are allowed to end and extend the booking. (Toggle: ON)
- On-spot Booking:** When enabled, members have the option to perform on-spot booking. (Toggle: ON)  
 Enable on-spot booking only (by enabling this, members can only book through the device)
- Same day Booking:** When enabled, only same day bookings are allowed. (Toggle: ON)
- Advanced Booking:** When enabled, members have to book in advance. (Toggle: OFF)
- Window Booking:** When enabled, you can set a window rule in which bookings can be made. (Toggle: OFF)

## VERSATILE ROLES/PERMISSIONS

Configure both default and customized roles with different resource and access permissions

- Assign permissions to different roles and user groups.
- Set access permissions to individual space groups across buildings and floors.

## WEB MANAGEMENT CONSOLE

### Statistics

View insightful data to plan and reorganize spaces and policies to continuously improve space utilization

### Resource Management

Create and configure Buildings, Floors, Desks and Devices for your organization and assign different amenities

### User Management

Import user list from your existing calendar and assign them to different user groups with variable permissions

### System Management

Configure system level settings such as Calendar, Firmware updates and system level policies

### Policies and Permissions

Assign booking policies to user and room groups and apply management and desk access permissions to user groups

### Feedback and User Notification

Receive real time feedback from users. Keep users informed through notifications.
